

CLIMBING CLIVE & THE ROLLING RASCALS

A game by MJK Games 2009
www.mjkgames.com

Fight your way past the evil rolling rascals and reach for the highscores! Drop your platforms and use them to climb over threats, learn to master changing level conditions in order to improve your result through all 26 levels. Climbing Clive & The Rolling Rascals is a test for your reactions – try out it now and compete with other players in the online highscore board!

Controls
W-A-S-D for moving around and jumping
Mouse for dropping platforms
Space for destroying all dropped platforms
Backspace for showing/hiding stats and level information

How to play
Place platforms (mouse click) onto play area so that you are able to climb (W for jump) over the *rascals* rolling from the right side of the screen. Pay attention to conditions which vary between every level; gravity, jump strenght, rascal speed, rascal size, Clive's speed, platform size and amount, among others, can change drastically between levels. Use *Trial Rounds* to prepare for these conditions. Trial Rounds present the speed and size of the rascals and let you to test gravity, jumping and walking before the level itself begins. Each level consists of 3-20 rascals, and once they all have been cleared, the level is completed.

Optimize your score
Get higher score by trying to reach the right border with as few platforms as possible. The closer you are to the right side of the screen, the more points you will get from a cleared rascal. If you play it safe, and stay close to the starting point (left), you are likely to get lower scores. Also using fewer platforms will increase your score. Level scores grow progressively towards the end so that later levels will reward you with even thousands of points.

The game sends all personal best results to the MJK Games server. Level scores are calculated for each level separately. Change score submission settings from Main menu -> Options.
